

KGS Hybrid® Floor Technology

The KGS Hybrid® Floor Technology is designed for floor edging with hand machines. This KGS technology is the most versatile giving exceptional results WET & DRY. It is working well on most natural stone and agglomerate floor materials including DRY polishing of TERRAZZO, as well as other light colored surfaces, where its neutral color minimizes any possibility of color transfer or staining.

Diameter: 100 or 125mm
Mounting with QRS
Diamond Size Availability

Grey	Green	Black	Red	Yellow	White	Blue	Orange	Brown
50	60	120	200	400	800	1500	3000	10000

Diamond Height Availability: 2.5mm
Article Numbers page 45

KGS Speedline® ORG Floor Technology

The original standard in both the Stone and Concrete Polishing Industries for excellence in quality and performance, this KGS technology is exceptional for WET polishing of granite, and in its 125mm size for DRY polishing of non colored concrete where its dark colored resin leaves a natural concrete colored finish.

Diameter: 100 or 125mm
Mounting with QRS
Diamond Size Availability

Grey	Green	Black	Red	Yellow	White	Blue	Orange	Brown
50	60	120	200	400	800	1500	3000	10000

Diamond Height Availability: 2.5mm

KGS Superflex™ Technology

This completely new technology from KGS provides the highest quality levels of polish in an easy to use and economical package. Designed primarily for DRY use on hand machines, its fast performance, flexible form, and economy make it an ideal tool for site use.
A set of KGS Superflex™ is a must have, in every tool box.

Diameter: 100 or 125mm
Mounting with QRS
Diamond Size Availability

Green	Black	Red	Yellow	White	Blue	Orange
60	120	200	400	800	1500	3000

Diamond Height Availability: 2.0mm
Article Numbers page 47

Gloss	Polish Levels				
	Matt Closed	Silky	Low Gloss	Medium Gloss	High Gloss
Final Grit	200	400	800	1500	3000

Tips Best results are achieved at 3,000-4,000 rpm.
125mm is the ideal size for edge polishing of floors allowing access under pipes and around obstacles without fouling the machine.
