Application
Specialist glass companies utilise KGS Spiral Bands and K-LOC discs for artistic or technical applications. Spiral Reamers are available in ø15, 22, 25, 30, 45 mm etc. Spiral Bands are available up to ø150 mm for expanding rubber drums. These products are mainly used in the Crystal Glass Industry, Lapidary and Technical Quartz manufacturing and also for stone and fiber-glass applications.

Speed
Max. 45 m/s

Features
The KGS Telum® pattern is generally best for corner dubbing machines and can be run with minimum coolant. Resin Bands are good for polishing on suitable machines. KGS Swiflex® SDA dry running spirals are also available.

Accessories
Rubber Drums are available.
